

STUDY COMMITTEE B2

Terms of reference of Working Group B2.33 - 2007 to 2010

Working Group Title:
Guidelines for cable cart/trolley (cycling) safety on old conductors (earthwires) equipped with aircraft warning markers (and other fittings).

Convenor:
Peter Catchpole (USA)
pcatchpole@powereng.com

Secretary:
Peter Dulhunty (Australia)
peter@dulhunty.com

Terms of reference:

The terms of reference of WGB2.33 are to study and report on guidelines for cable cart/trolley (cycling) safety on old conductors (earthwires) equipped with aircraft warning markers (and other fittings). The duration of the WG is 3 years and will deal with the following aspects.

The key needs of the Target Groups have been identified by SCB2 as the following: -

Guidelines for cable cart/trolley (cycling) safety on old conductors (earthwires) equipped with aircraft warning markers (and other fittings).

Specific Actions to meet the key needs are:

Guidelines for cable cart/trolley (cycling) safety on old conductors (earthwires) equipped with aircraft warning markers (and other fittings).

A questionnaire will be designed and circulated through the normal channels to identify current practice and highlight important issues.

Target – Technical Brochure by end 2009/early 2010.

Major Links with other Groups

- ▶ SCs :- None
- ▶ WGs : WGB2 on conductors and fittings,...
- ▶ IEEE :- WG on Overhead Conductors
- ▶ IEC :- TC11 – MT1 & WG09

Approval by Technical Committee Chairman: Klaus Fröhlich
